SAS® Academy for Data Science

**DATA
CURATION**

Certified-Level: **DATA CURATION**

Gain a solid understanding of data management, Hadoop and other big data concepts. This credential is a good starting point if you're pursuing a data science certification because it's a required part of the series.

**ADVANCED
ANALYTICS**

LEARNING**

DATA CURATION

Certified-Level: **DATA CURATION**

Gain a solid understanding of data management, Hadoop and other big data concepts. This credential is a good starting point if you're pursuing a data science certification because it's a required part of the series.

ADVANCED ANALYTICS

Certified-Level: **ADVANCED ANALYTICS**

Expand your analytical skill set by learning the latest advanced analytics technologies, such as machine learning and predictive modeling. You'll gain the ability to solve critical business challenges across every domain - and, if you combine Advanced Analytics with Data Curation, you can earn a certification as a data scientist.

DATA CURATION

Certified-Level:

DATA CURATION

Gain a solid understanding of data management, Hadoop and other big data concepts. This credential is a good starting point if you're pursuing a data science certification because it's a required part of the series.

ADVANCED ANALYTICS

Certified-Level:

ADVANCED ANALYTICS

Expand your analytical skill set by learning the latest advanced analytics technologies, such as machine learning and predictive modeling. You'll gain the ability to solve critical business challenges across every domain - and, if you combine Advanced Analytics with Data Curation, you can earn a certification as a data scientist.

AI & MACHINE LEARNING

Certified-Level:

AI & MACHINE LEARNING

Learn how to analytically approach business problems while using a business case study to understand the analytical life cycle. This credential is valuable on its own - or you can combine it with Data Curation to qualify for a data science certification.
